EDUCATION

University of Lagos

Lagos, Nigeria.

Bachelor of Science in Mechanical Engineering

January 2021 – February 2027

- Relevant Coursework: Mathematics, Physics, Software Engineering, Data Structures & Algorithms, Applied Mathematics.

SKILLS

Languages: SQL, Python, JavaScript, MATLAB.

Frameworks: TypeScript, NestJS, ShadCN, TailwindCSS, React(Next.js), Node.js(Express), Selenium, ElasticSearch.

Developer Tools: Git, Docker, GraphQL, Grafana, Prometheus, Kubernetes, Jira, AWS, Azure.

Database: MySQL/PostgreSQL, Redis, MongoDB, Firebase.

CI/CD: GitHub Actions, Jenkins.

EXPERIENCE

Backend Software Engineer

July 2025 – Present

Pedxo *Nigeria*

- Developed and maintained the backend, a talent recruiting platform using NestJS and TypeScript, building REST APIs, authentication, authorization, database operations, and core business logic.
- Contributed to Pedxo Pay, a dedicated payment service responsible for processing talent payments and facilitating user account funding, integrating backend services to support secure and reliable financial transactions.

Backend Software Engineer

November 2024 – June 2025

BJTM Technologies *Nigeria*

- Engineered and optimized trading software solutions, enhancing execution speed by 30% and reducing system latency through efficient data processing and backend optimization.
- Collaborated with quant and dev teams to implement real-time market data integrations and risk management tools, ensuring high system reliability and 99.9% uptime in a fast-paced trading environment.

Software Engineer Intern

April 2024 – November 2024

Nithub *Nigeria*

- Engineered a full-stack stock market analysis platform using Node.js, Express.js, React.js, and TypeScript, delivering real-time financial insights and boosting user trading efficiency by 40% through interactive data visualizations and predictive analytics
- Achieved 80%+ test coverage and reduced API response times by 25% through backend optimizations, ensuring high-performance, fault-tolerant deployment for data-intensive operations.

Junior Software Engineer

August 2023 – November 2023

TradeLenda *Nigeria*

- Worked remotely as a Junior Developer at a fintech company, contributing to the development of scalable web applications that supported a 35% growth in user engagement and helped position TradeLenda and One Kiosk as leading African brands.
- Gained hands-on experience with TypeScript, Node.js, NestJS, and MongoDB, and collaborated cross-functionally to deliver production-ready solutions, reducing development time by 25% and improving system stability by 30%.

Support Intern

October 2022 – November 2022

Stanbic IBTC *Nigeria*

- Streamlined customer service operations and administrative processes, reducing resolution time by 20% while contributing to regulatory compliance by auditing transaction records, verifying documentation accuracy, and ensuring adherence to internal policies and financial regulations.

PROJECTS

Unilag Campus Explorer | [Link](#)

April 2021 – October 2021

- Developed a full-stack campus navigation web application for the University of Lagos, enhancing accessibility for 5,000+ users by integrating Dijkstra's Algorithm and real-time geolocation in Python to reduce navigation time by 40%.
- Designed a responsive, cross-platform UI with React.js, TypeScript, and TailwindCSS, achieving 100% mobile compatibility and boosting user engagement by 25%.

VOLUNTEER EXPERIENCE

eCXUnilag | Software Engineering tutor

February 2023 – February 2024
Nigeria

- Mentored over 100 aspiring engineers through real-world software projects using Git, Python, and modern web stacks, increasing project completion rates by 60% and accelerating their transition from theory to production-level development.
